

LITTLE RED HEN WATERER

Little Red Hen Waterer Instructions

Our top-fill drinker is very easy to use but there are a few simple things to remember when assembling it.

1. The black filter inside the reservoir should fit snugly into the center hole inside at the bottom (be careful not to throw it away accidentally!).
2. Ensure the foam float is positioned with 'This side up' facing upwards in the middle of the trough.
3. The red plastic cork should be inserted flat end first in the bottom of the reservoir so that the round end is visible.
4. With float and plastic cork in place, snap reservoir onto trough to lock it in place.

Once assembled, all you need to do is lift the lid and top up with water, it couldn't be easier!

Clean regularly with hot soapy water. We recommend standing the drinker on level ground. Hanging it when full may cause the reservoir to warp.

Check drinkers regularly especially in frosty or hot conditions.
